

Safer & More Secure Financial Institutions

HIKVISION

Hikvision banking and finance security solutions provide unique integrated security technology with an extensive portfolio that help financial institutions improve operational efficiency, asset protection and brand management.

Solutions Include:

- **HikCentral CMS:** A fully scalable central management system for ease of monitoring single or multi-location financial institutions.
- **TurboHD:** Hikvision's HD over Coax solution enables upgrade to HD images and video using existing cable infrastructure, saving time and money over typical IP upgrades.
- **Line Queueing:** Improve banking operations by providing actionable business data on patron wait times, ensuring optimization of staff levels and improving customer service.
- **Facial Recognition:** Hikvision's facial recognition technology allows for quick authorized access, efficient record keeping, asset protection, and it supports loss prevention efforts.
- **Access Control:** Access control and optical biometrics secure employee access, while ensuring only authorized staff gains access to key, restricted areas.
- **Enterprise Storage:** Large-scale, affordable enterprise storage solutions enable efficient storage and retrieval of large amounts of video, while saving money on network bandwidth usage and lowering storage requirements.
- **Point-of-Sale (POS) Integration:** POS integration, merging POS data and video, provides banks with better teller visibility, transaction verification, and loss prevention.
