

Title:	ADT Camera Firmware	Version:	v1.0	Date:	101216
Product:	ADT Cameras			Page:	1 of 1
Action Required:	None, Information Only				

Summary

This document provides an overview of problems with the Hikvision Plug and Play feature when using custom ADT firmware in Hikvision cameras.

Problem

Custom ADT camera firmware does not support Hikvision Plug and Play. When connecting a camera with ADT firmware to a Hikvision DVR, the camera must be added manually.

Solution

- **Future Shipments:** All future shipping ADT cameras will no longer use custom firmware, but will be loaded with Baseline firmware, which will support Plug and Play functionality.
- **Past Shipments:** Cameras with custom ADT firmware can be upgraded to the latest baseline firmware, using the standard firmware upgrade procedure, to restore the Plug and Play function.
