

<b>Title:</b>	TB DS-2CExxDFT-L Configuration 070219NA	<b>Version:</b>	v1.0	<b>Date:</b>	070219
<b>Product:</b>	DS-2CExxDFT-L ColorVu Analog Cameras			<b>Page:</b>	1 of 4
<b>Action Required:</b>	None, Information Only				

## Summary

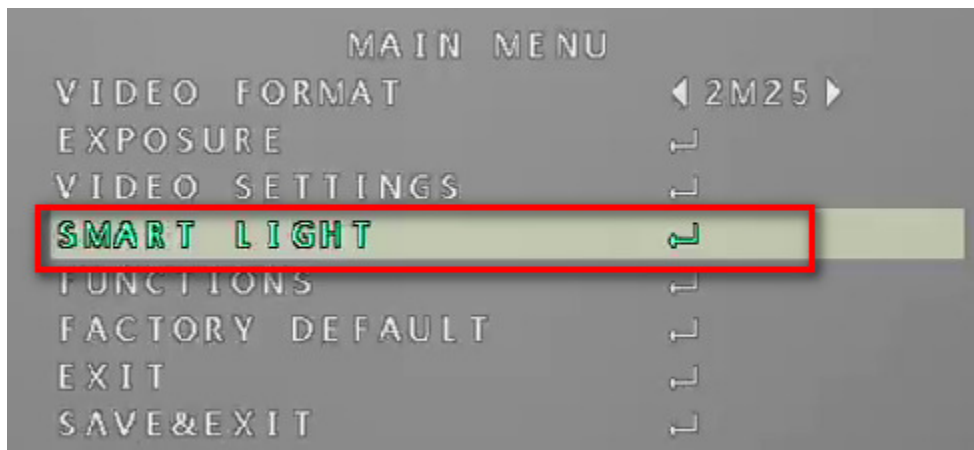

The new DS-2CExxDFT-L Series cameras not only provide 7 x 24 full-color monitoring, but also can now activate a flashing light action when certain events are detected.

The connected DVR must be an –M Series device running firmware v4.20.200. If the camera is connected to a different DVR, Trigger Alarm Output will be enabled automatically and cannot not be changed.

## Configuring a DS-2CExxDFT-L ColorVu Camera

### ■ Smart Light Configuration

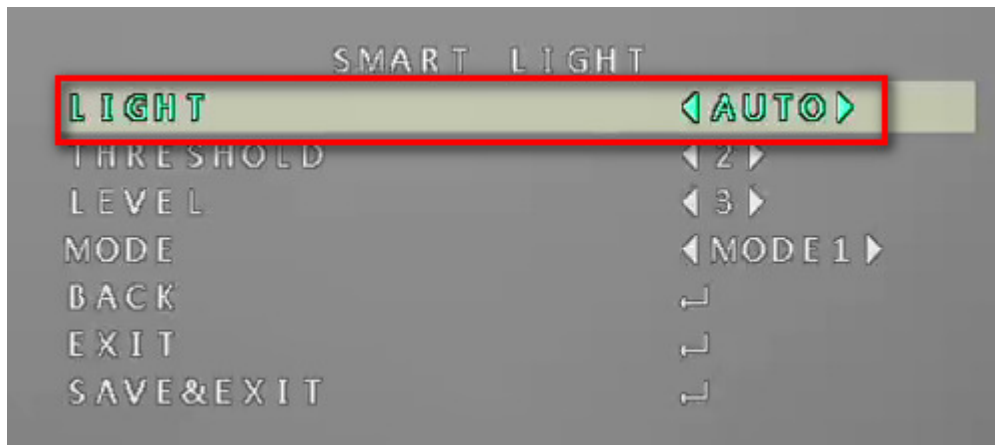

1. Go to **Main Menu > Smart Light** to turn on/off the supplement light.

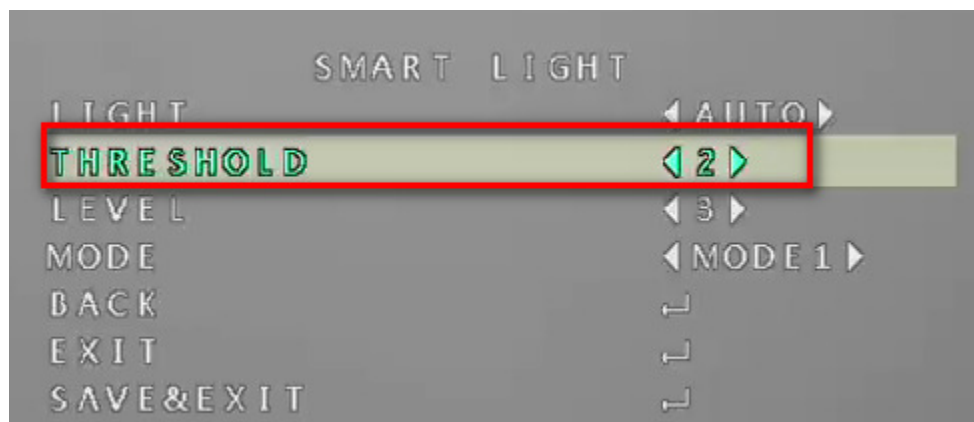

2. Set the following settings, as desired.

- **Light**
  - **Off (Default):** Supplement light is off
  - **Auto:** Controls the light according to the environment's illumination.

<b>Action Required:</b>	None, Information Only				

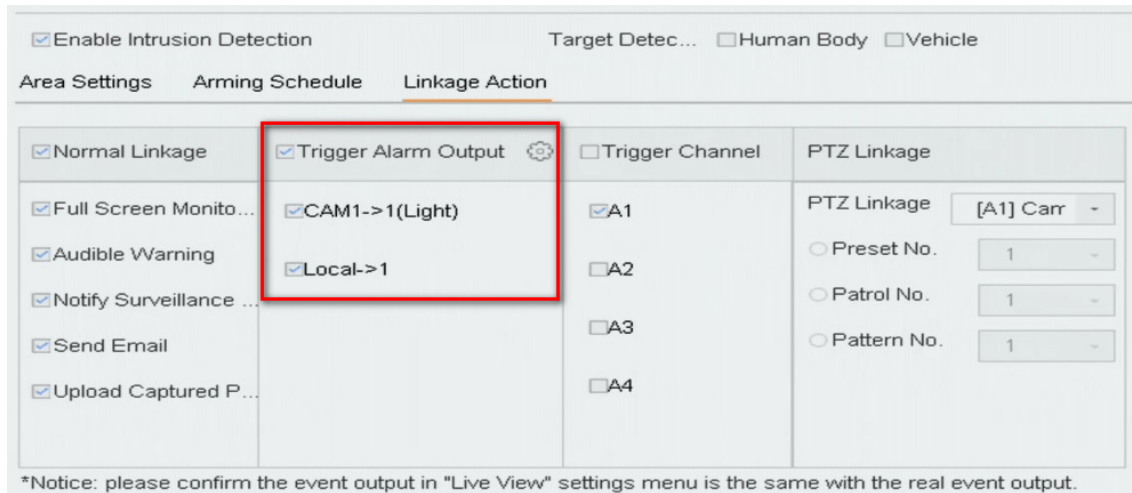

- **Threshold (1 to 3):** Sets device sensitivity. The higher the value, the easier the light will turn on.
- **Level (1 to 5):** Sets the maximum light intensity. If set to 5, it could reach the maximum intensity level, however the actual intensity is controlled by the camera according to the ambient illumination.

## ■ Linkage Action Configuration

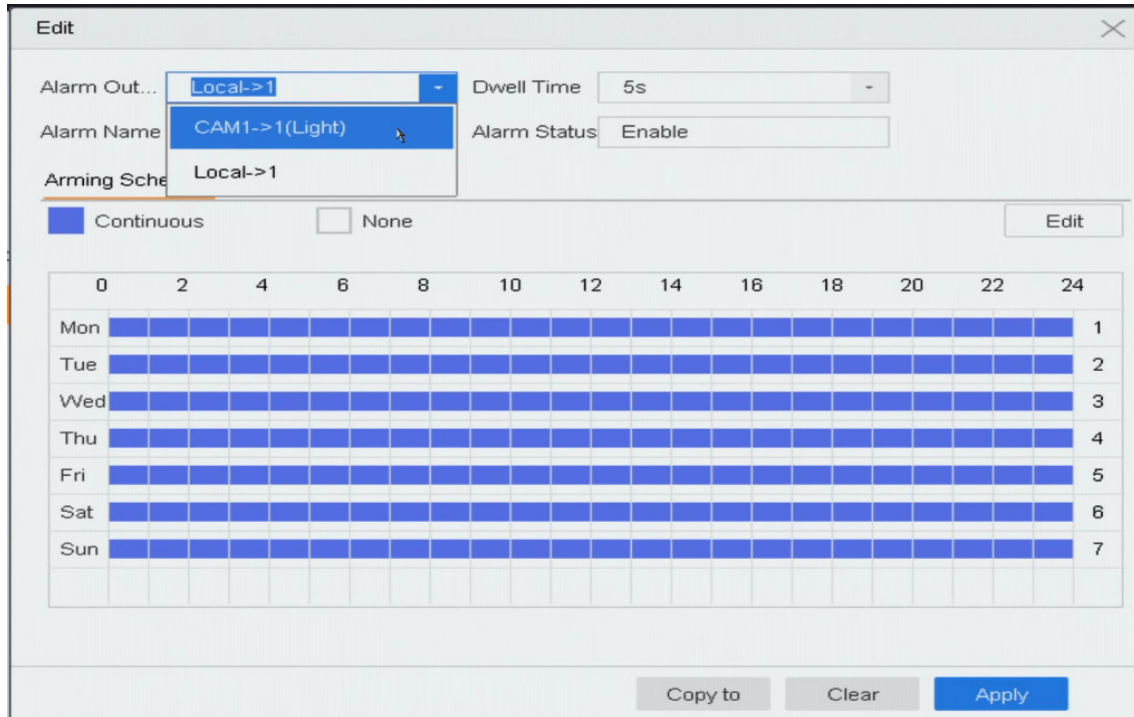

1. In the DVR local configuration interface, **Configuration > Event > Smart Event**, there is a new flashing light alarm linkage action.

2. Click the setting icon to set the arming schedule.
